How to Install your SYSPRO License

It is recommended that all users be out of the system before installing your license. This guide also includes instructions on updating the e.Net license. The instructions below are for SYSPRO 7/7.1, but the same general instructions will also work for earlier versions.

You should have received an email from SYSPRO including your XML license file(s). You may have received two; one being your "core" license, and another being your "add-on" license. If you only received one, this is the only set of instructions you will need. If you received an add-on license, you will need to refer to our "How to install your SYSPRO Add-On License" guide.

1. First, save your SYSPRO license file on the SYSPRO Application Server. SYSPRO recommends that the license be saved in your SYSPRO/Work folder, but it can be saved in another location if you prefer. Your license file should look similar to the one below.

 Next, login to SYSPRO (preferably on the server) and go to Setup > General Setup > Company Setup > "Select Company" > Change. Please keep in mind, these steps will need to be performed for all companies.

6. Repeat the above steps for all of your SYSPRO Companies. *If you are licensed for e.Net, please continue to the next steps.*

 Please verify all users are out of the system, then go to Setup > General Setup > System Setup > Configure e.net License

8. Select to "Import LICENSE.XML file" and click "Next"

9. Click the magnifying glass to browse to the same XML license file that you imported above, click "Open"

11. Another screen will now come up asking you to apportion business objects and web applications. If you have not purchased any new objects/web apps or new licenses for those, then you can just click "Next"

12. Another box may pop up if you are not currently using e.net. If it does, you can click "OK" to continue and the licenses can be apportioned when you do start using it.

13. Click "Finish"

14. Your e.net license is now updated. If you have an Add-On license, please refer to the Add-On license installation guide.
